

CHAPTER 10

PURPOSE, OBJECTIVES AND ORGANIZATION

THIS PAGE LEFT BLANK INTENTIONALLY

Chapter 10 Purpose, Objectives and Organization

Purpose The purpose of this plan is to identify the organization and roles, outline the activation processes and specific operations of the Expanded Dispatch organization.

Expanded Dispatch is established when a high volume of activity indicates that increased dispatch and coordination capability is required to relieve Central Idaho Interagency Fire Center (CIC) of the support function of one or more large incidents or smaller multiple incidents. The Center Manager has coordinator responsibilities for this organization and is responsible to the Agency Administrator to which the incident(s) jurisdiction belongs.

Objectives

1. Establish guidelines as to when Expanded Dispatch and support functions are implemented.
2. Define how to implement Expanded Dispatch operations.
3. Support multiple or project fires by expanding CIC.
4. Provide a smooth and safe transition from mobilization to demobilization for all resources.
5. Allow CIC staff to function in their regular duties once Expanded Dispatch is activated.

Organization When complexity levels exceed initial attack capabilities Fire Management shall determine the appropriate management structure. The ICS positions shall be added commensurate with the complexity of the incident.

Local Organization Activation may only require local procurement personnel, transportation coordination and other local functions for short term support. The recommendation may require the full activation of the Incident Support Organization (ISO). Local personnel shall be utilized to the extent possible prior to placing orders through the standard dispatch channels.

Expanded Dispatch Organization When an Incident Management Team (IMT) is ordered the Center Manager will recommend that the full compliment of Expanded Dispatch be activated. Staffing is based on need rather than a pre-conceived organizational chart. The volume

of orders and complexity of the incident(s) determine staffing levels and the degree of expertise required of the organization.

To function adequately initial staffing could consists of:

- 1 Supervisory Dispatcher
- 1 Support Dispatcher – Overhead/Crews
- 1 Support Dispatcher – Equipment
- 2 Support Dispatchers or 1 Support Dispatcher and 1 Dispatch Recorder – Supplies

Position Descriptions

Center Manager The Center Manager supervises the Expanded Dispatch Coordinator; and in the absence of a Coordinator supervises the Expanded Dispatch Supervisory Dispatcher.

Checklist

- Mobilizes the Incident Support Organization, i.e. transportation, fire cache, and local purchasing unit.
- Provides assistance to the Buying Team.
- Coordinates initial mobilization of resources.
- Provides for security for all operations; including PC computer security clearance for all support personnel and facilities' security. May order a Security Coordinator if the need arises.
- Ensures Resource Order numbers and Fiscal Codes are maintained for each incident.
- Guarantees adequate supervisory personnel for each shift.

Expanded Dispatch Coordinator (CORD) The Center Manager and Fire Management could recommend ordering a CORD for multiple large or complex fires.

Checklist

- Supervises the Supervisory Dispatcher(s).
- Staffing of qualified personnel.
- Coordinates equipment/supply desks interaction with the Buying Team to establish a fluid working relationship.

- Responsible for demobilization; orders a Demob Coordinator if necessary.
- Schedules shift briefings for Expanded Dispatch and ISO personnel.
- Responsible for compiling a complete Incident Packet prior to demobilization when transitioning back to the Agency.
- Completes evaluation of the Supervisory Dispatcher.

Expanded Dispatch Supervisory Dispatcher (EDSP) A

Supervisory Dispatcher is a facilitator, accomplished by adequately staffing and supervising operations and maintaining a positive and effective coordination with the IMT.

The EDSP interacts with Agency Management and the Incident Support Organization (ISO) as well as the media, private contractors and the general public.

Checklist

- Obtains briefing from Supervisor.
- Develops an effective organization to meet present and future needs of the incident(s) and host Agency.
- Oversees that documentation is pertinent and complete.
- Ensures that computer security is not compromised.
- Follows established policies and procedures to meet changing priorities and situations in an orderly, safe and cost-effective manner.
- Makes recommendations on resource priorities. Identifies alternatives when implementing management direction.
- Conducts operations referencing local, area and national guidelines.
- Provides training of local procedures for subordinates as necessary.
- Defines performance expectations for the organization personnel.
- Completes performance evaluation for EDSD(s).
- Provides for the disposition of all records associated with Expanded Dispatch operations.

Expanded Dispatch Support Dispatcher (EDSD) A Support Dispatcher is qualified to perform one or more of the functional areas and supervised by the EDSP.

Checklist

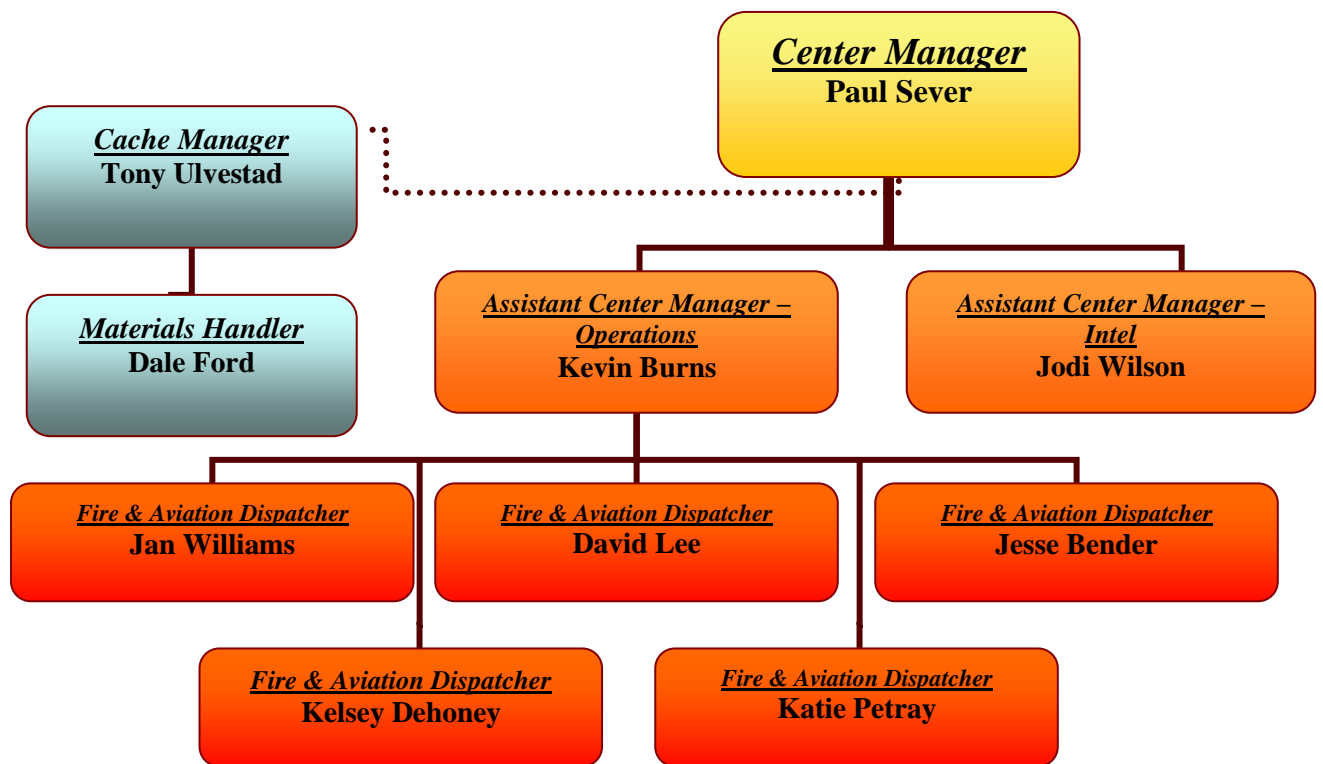

- Obtains briefing from supervisor.
- Processes resource orders and supplemental forms to completion.
- Applies procedures outlined in Agency guides, handbooks and manuals.
- Operates telecommunications systems.
- Supervises and evaluates Dispatch Recorders.
- Communicates pertinent information to supervisor, co-workers and incident personnel.
- Gathers available information necessary to immediately assess situation, determine priorities and take action as appropriate.

Expanded Dispatch Recorder (EDRC) The Dispatch Recorder has a working knowledge of the purpose and process of completing the resource order and other dispatch forms.

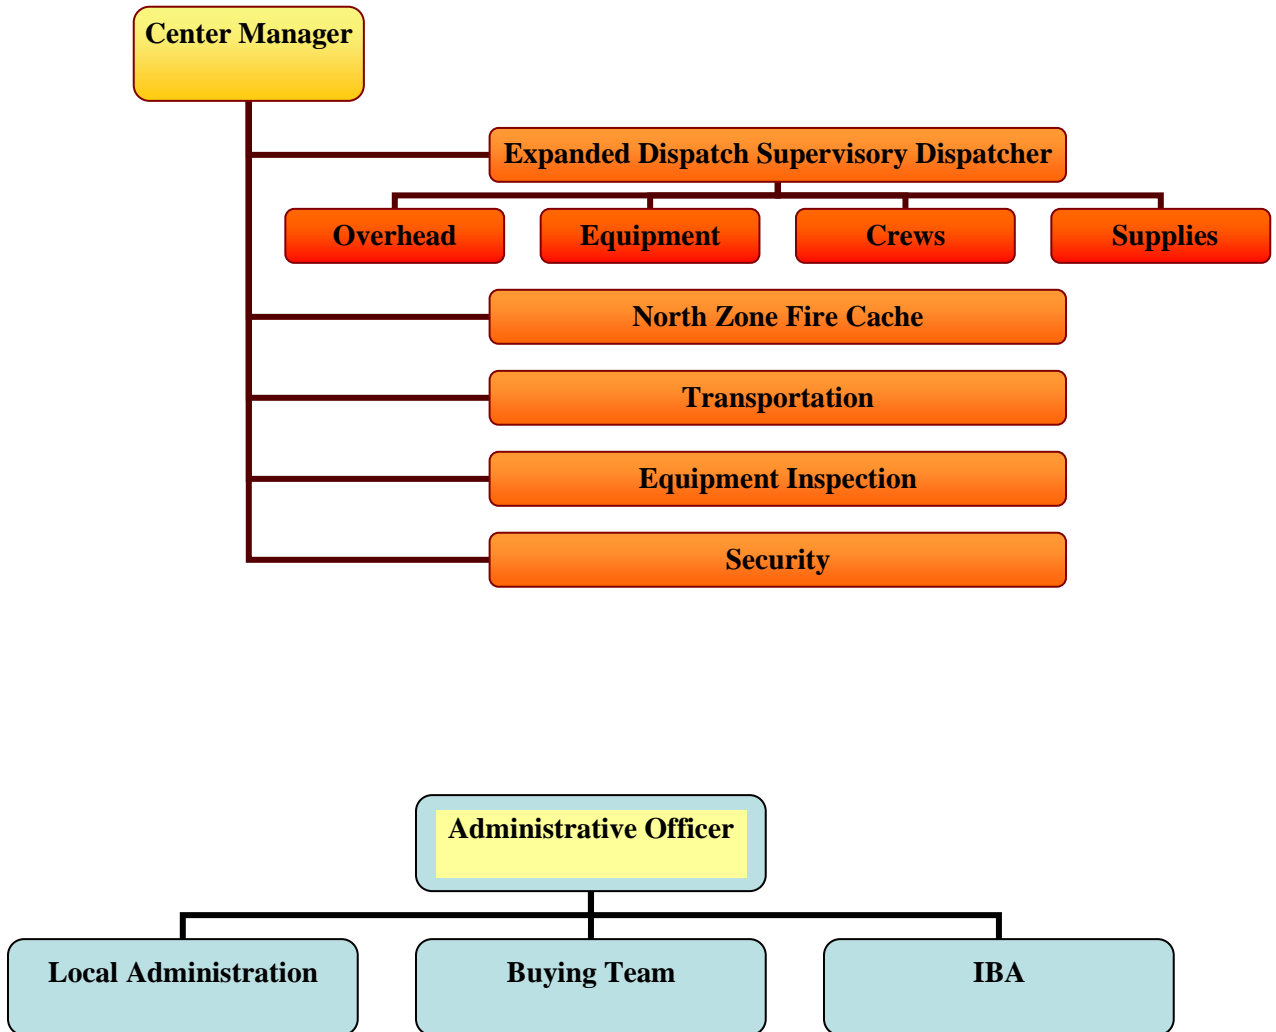

Checklist

- Obtains briefing from supervisor.
- Processes resource orders and supplemental forms to completion utilizing the web-based Resource Ordering and Status System (ROSS) computer program using established ordering procedures.
- Compiles, maintains, tracks and communicates resource status and pertinent information to supervisor, co-workers and incident personnel.
- Supplements resource order with appropriate forms, such as Food Service Requests, Mobile Shower Units and Passenger/Cargo Manifests.

Central Idaho Interagency Fire Center Organization Chart

Incident Support Organization Chart

THIS PAGE LEFT BLANK INTENTIONALLY

CHAPTER 20

ACTIVATION

THIS PAGE LEFT BLANK INTENTIONALLY

Chapter 20 Activation

Activation The Center Manager shall activate the Expanded Dispatch organization once a need has been identified using the following criteria:

- 1 Local Planning Level is at 4 or above.
- 2 A Type 1 or 2 Incident Management Team (IMT) is ordered.
- 3 Multiple Type 3 or Type 4 incidents.

Expanded Dispatch Checklist

- Prepare Expanded Dispatch/Buying Team facility prior to activation.
- Place ticket with FS Customer Help Desk for ports activation if CIO specialist has not already done so.
- Order IMT, Buying Team and Expanded Dispatchers, and alert local procurement staff.
- Activate transportation unit.
- Activate Equipment Inspectors.
- Duplicate copies of all resource orders for incoming IMT transition including initial attack resources assigned to incident.
- Provide transportation and lodging for incoming dispatchers.
- Compile list of qualified local personnel for Expanded and ISO positions.
- Schedule a Team briefing.
- Process IMT pre-order (Approved by Center Manager).
- Identify resource priorities for next shift and critical orders unfilled.
- Identify Incident Base Camp and driving directions to the camp.
- Incident communications system established.
- Fax Expanded Dispatch telephone numbers to Eastern Great Basin Coordination Center (EBC) and neighboring dispatch centers.
- Establish Check-In at the nearest location to incident.

Facilities & Equipment Expanded Dispatch facilities and equipment shall be pre-identified, procured and available for immediate setup. The following key items should be provided for:

- 1 A workspace separate from, but accessible to, Initial Attack (IA) is located in the BLM small conference room, Public Lands building in Salmon, Idaho.
- 2 Adequate office space (lighting, heating, cooling, security).
- 3 Communications equipment

Expanded Dispatch Plan

- a. Telephone, computer hardware and kits for each functional area are located in the locked storage room in the conference room. The key to the storage room is located in the dispatch center.
 - b. Phone numbers identified.
 - c. Laptop kits containing computer, mouse and pad, Ethernet Cable, power adapter and keyboard.
 - d. Laptops will be updated prior to June 1 with virus protection, ROSS, and Web capability; initial as updated.
4. Expanded kits are stored in the locked storage room in the conference room. Additional office supplies and guides are in the hall cabinets on the southeast side of the BLM conference room.
5. Additional tables and chairs can be acquired from the Fire Cache (CIK).
6. Restocking office supplies and forms will be done before Expanded Dispatch closes-out and the EDSP is released from the assignment.

Garbage Bags	Reinforcements	Calendars		

Fire Business & Administration Support Every ROSS account holder shall annually read and sign the *Statement of Employee Information Security Responsibilities* and *Statement of Information Security Responsibilities for Associate Users of Forest Service Systems*. The dispatch center will keep the signed forms on file. The forms (Rules of Behavior) are located at the ROSS Home Page at <http://ross.nwcg.gov>. The ROSS Account Managers shall activate and deactivate ROSS user profiles.

Administrative Support functions are equipment and personnel timekeeping, Buying Team, Fire Business specialist, local compensation and claims specialist. An Incident Business Advisor (IBA) may be assigned by the Agency Administrator to assist with incident business.

Buying Teams Buying Teams (BUYT) support incidents by procuring services, supplies, land agreements, and equipment rental. BUYTs are ordered when incident support requirements exceed local unit capacity. They are responsible to the Administrative Officer.

As a minimum, when an IMT is assigned, a local Buying Team will be established. Reference the *Annual Operating Guidelines Incident Business Administration, Salmon-Challis National Forest* on established local policy.

Administratively Determined (AD) Militia Hiring of ADs will be accomplished by a request through Expanded Dispatch. Each zone has an AD hiring agent and will follow National procedures in the hiring process. AD hiring at the incident is not allowed. Casuals are required to adhere to established Incident Behavior responsibilities and may be released if inappropriate behavior occurs.

Casual employees must meet the minimum training requirements for the position prior to an assignment. Casuals are hired and compensated in accordance with the Pay Plan for Emergency Workers (IIBMHB Section 13.6, Exhibit 01).

Pay Provisions The home unit is responsible to apply agency-specific pay provisions and regulations to emergency incident pay documents. On-shift time includes actual work, ordered standby and compensable travel. On-shift time has a specific start and ending time

and is recorded as clock hours. Individuals are required to report to their designated work site as scheduled, ready and willing to perform work safely.

Timekeeping/Recording Procedures The Crew Time Report (CTR) is the initial timekeeping document. The CTR booklets are stored in the hall supply cabinet. The Center Manager will determine the process of entering personnel time on the CTR. Entries are transferred by the Personnel Time Recorder (PTRC) to Emergency Firefighter Time Report, OF-288. Military time shall be used on all records pertaining to time recording.

The EDSP certifies time worked by signing the CTR as the approving official for each operational period. (Reference IIBMHB for specific instructions.) The approving official ensures documentation of excess hours, work/rest and other record-keeping items. The supervisor should be aware of the pay status of their subordinates as this affects recording requirements.

Travel See the Travel Binder located in Initial Attack for the current Travel process and forms.

Meals A meal period of at least 30 minutes must be ordered and taken for each six hours on duty (e.g., a minimum 30 minute break in an 8 to 12 hour shift).

Per Diem Incident funded personnel in travel status are fully subsisted by the government in accordance with their agency regulations. Locations on the Salmon- Challis National Forest and Salmon & Challis BLM Field Offices are the standard CONUS rate. (See <http://www.gsa.gov>)

Regular government employees should follow their agency policy for the use of a government issued charge card to obtain lodging and meals. Per Diem rates must be adhered to.

Individuals may be requested to use their POV for official business when such use is advantageous to the government. The individual is reimbursed for use through the current mileage rate.

Work/Rest & Length of Assignment To maintain a safe and productive work environment, supervisors will appropriately manage work and rest periods, assignment duration and shift length for all personnel.

Shift Schedules Shifts will be coordinated to meet the needs of the incident and CIC. Schedules shall overlap one-half hour to allow for a briefing period between shifts. Normally shifts will be no greater than 12 hours. To maintain safe, productive incident activities supervisors must appropriately manage work and rest periods, assignment duration and shift length.

Work/Rest Plan for and ensure that all personnel are provided a minimum 2:1 work to rest ratio (for every 2 hours of work or travel, provide 1 hour of sleep and/or rest).

Work shifts that exceed 16 hours and/or consecutive days that do not meet the 2:1 work/rest ratio should be the exception, and no work shift should exceed 24 hours. However, should this occur, personnel will resume 2:1 work/rest ratio as quickly as possible.

The Center Manager must justify work shifts that exceed 16 hours and do not meet the 2:1 work/rest ratio. Justification will be documented in the daily incident records. Documentation shall include mitigation measures used to reduce fatigue. The Supervisory Dispatcher's approval of the Emergency Firefighter Time Report (OF-288) certifies that the required documentation is on file, and no further documentation is required for pay purposes.

Length of Assignment A minimum fire assignment of 14 days, excluding travel, (can be negotiated with home unit to 21 days) should be expected, unless prior arrangements are agreed upon by the sending and receiving units.

An assignment is defined as the time period between the first full operational period at the first incident or reporting location on the original resource order and commencement of return travel to the home unit. Time spent in staging and preposition status counts toward the 15 day limit, regardless of pay status, for all personnel including an IMT.

After completion of a 14 day assignment and return to the home unit, two (2) mandatory days off will be provided. Days off must occur on the calendar

days immediately following the return travel in order to be charged to the incident. If the next day(s) upon return from an incident is/are a regular work day(s), a paid day(s) off will be authorized.

Casuals (AD) resources are not entitled to paid days(s) off upon release from the incident or at their point of hire.

Assignment Extension Prior to assigning incident personnel to back-to-back assignments, their health, readiness, and capability must be considered. The health and safety of incident personnel and resources will not be compromised under any circumstances.

Assignments may be extended when:

- Life and property are imminently threatened.
- Suppression objectives are close to being met.
- A military battalion is assigned, or
- Replacement resources are unavailable or have not yet arrived.

Security and Emergency See *Self-Protection Plan for Forest Service Headquarters Building* and the *Salmon Field Office Emergency & Evacuation Handbook* in IA.

THIS PAGE LEFT BLANK INTENTIONALLY

THIS PAGE LEFT BLANK INTENTIONALLY

CHAPTER 30

OPERATIONS

THIS PAGE LEFT BLANK INTENTIONALLY

Chapter 30 Expanded Dispatch Operations

Ordering Procedures The following procedures are recommended but can be modified to meet specific needs and are outlined in depth in the National and Great Basin mobilization guides. Every attempt will be made to fill orders on the basis of urgency, availability, delivery time, cost effectiveness and operational impact on the local unit.

Orders shall be negotiated and alternatives presented to increase efficiency when appropriate. Orders for local overhead resources will be placed directly with the individual generally after consultation with Central Idaho Dispatch (CIC). Coordination with CIC is critical when committing local resources.

Coordination with IA is imperative when requesting aviation resources. All tactical aircraft scheduling, coordination and control will be handled by CIC and will provide Flight Following to ensure airspace coordination.

IA will be briefed when an Incident Management Team (IMT) requests aviation overhead resources; this facilitates resource tracking and prevents duplication of orders. Commercial flights will be initiated and processed by Expanded Dispatch as well as the transportation logistics to and from commercial jetports.

Incident Management Team (IMT) Transition Orders for an IMT will be placed through established ordering channels utilizing an Overhead Group Request to EBC and configured according to the National Interagency Mobilization Guide Chapter 63.1.1, Interagency Incident Management Team Configuration.

A Long Team configuration shall be the normal request within the Great Basin unless the requesting unit specifically requests a Short Team. The IMT pre-order may be negotiated with the host agency and monitored by the Center Manager. Requests for initial attack resources will be negotiated at the time of the Team transition. Copies of all resource orders will be given to the IMT at the Team briefing.

Resource Ordering Status System (ROSS) ROSS is an automated resource ordering, statusing and reporting database designed to streamline

the resource ordering process. ROSS will track all tactical, logistical, service and support resources mobilized by the incident dispatch community.

“MNEMONICS”

APPENDIX E

The Food Service Request and Passenger and Cargo Manifest forms are the approved forms that, when associated with a ROSS request, satisfy documentation required for resource mobilization.

Resources will be requested using the standard resource categorization and identified with a unique request number. Expanded Dispatch will assign request numbers unless otherwise negotiated with the IMT. A block of numbers could be issued to the IMT. National Cache System resources should be ordered through established channels.

Times (ETA and ETD) in ROSS are local time zones. Travel information for resources mobilizing to and demobilizing from an incident will be transmitted by creating a travel itinerary in ROSS. Travel legs will reflect the mode of travel, carrier with flight numbers, departure location, date and time, and arrival location.

Fiscal codes shall be included on each approved form. The Interagency FireCode Program generates a four (4) character code. Dispatch enters the fiscal codes in ROSS when a **New Incident** is generated.

Unable to Fill (UTF) Procedures Local Centers are granted a one hour “Fill or Kill” policy. It is vital to communicate time frame status to the incident. A 48-hour “Unable to Fill” policy exists nationally. NICC will return requests to the ordering GACC with a “UTF 48 hours” after receipt, unless notified the order can be filled. NICC will not accept or process any requests previously UTF unless a new request number is assigned.

Driving Directions for New Incidents

APPENDIX F

Neighborhood Policy Resource requests as a result of an incident, preparedness, severity, wildland or prescribed fires will follow established ordering channels. Resource Orders can be placed directly to our neighbor(s) listed below:

The following conditions must be met when utilizing the Neighborhood Policy:

1. Resource ordering standards and reassignment procedures apply for all resource movement.
2. Place the order with EBC when a resource is unavailable through the Neighborhood Policy. The GACC will not normally check with the requesting Dispatch Center's neighbors (unless the Neighborhood Policy has been withdrawn).
3. Resources cannot be reassigned to another unit if the resource was originally mobilized through EBC or Western Great Basin Coordination Center (WBC). A neighbor's resource may be reassigned only with the neighboring dispatch's permission.
4. At the Center Manager's discretion and with the GACC approval, a unit may temporarily withdraw their participation in the Neighborhood Policy.

Dispatch & Coordination Centers Directory

Appendix G

Overhead Trainee assignments will be filled with local personnel identified in the annual Forest/BLM Priority List. This is not a rotation list. The first name listed for each qualification stays on the top of the list until removed by the Qualifications Committee. Once available local and neighboring resources have been exhausted, orders will be placed directly with EBC.

Trainee Priorities

Appendix H

The dispatcher shall ensure **ALL** performance criteria are met before filling an Overhead request. Requests will be processed as "Fully Qualified" unless "Trainee Acceptable" is selected as an Inclusion in ROSS.

Name requests will be accepted for highly specialized positions or to meet specific agency objectives. The ordering unit must confirm availability of the individual being requested prior to placing the request. Name requests are appropriate in Severity requests.

Fill Procedures An Overhead Resource is in the ROSS database; fill the request as outlined in the ROSS instructions found on the web at ross.nwccg.gov.

A Resource is a Government Employee, but the Resource is not in ROSS; fill the request using **Fill with New Resource**. This generates an assignment history and will remain in the ROSS database.

A Resource is *not* a government employee and is *not* in ROSS; fill using **Fill with EFF/AD**. This procedure will not track assignment history.

The Resource is *not* a government employee and is *not* in ROSS, but has an Agreement; fill using **Fill with Agreement**. Add the Agreement Number when filling the request.

To fill a Name Suggest or if the responder does not appear when queried, check the resource's status. The resource may not have been made available. Next, query the **Resource Item - Qualification** tab to determine if the responder has that specific qualification.

A driver is a local resource and not a NWCG qualification. The Center Manager will generate a hardcopy Overhead Resource Order as **Large Fire Support**.

Crews Type 2, Type 2 IA or Type 3 Crews ordered through NICC **DO NOT** come with chain saws or hand tools when transported by air. If chain saws or hand tools are needed, they are ordered as supply items from the local cache. In the **Special Needs** block in ROSS specify ***“Non-local Crews to be double-lunched”***.

Standard crew size is twenty (20) people maximum and eighteen (18) people minimum (including Crew Boss and trainees).

All crew personnel mobilized and demobilized will be identified on a crew manifest. Crew weights will be manifested separate from personal gear and equipment weights.

Supplies Materials or goods not defined in any other resource or service category are considered supplies. Local purchases will be placed directly with the local procurement unit. Cache supply orders will be requested through the local caches. If unable to fill locally place the Resource Order with the Great Basin Cache (GBK). Cache orders will be filled to meet time frames specified, using the most economical means.

NFES Supplies Orders for NFES items can be placed directly to GBK by Type 1 and 2 IMTs, with concurrence from the host agency, thus bypassing Expanded Dispatch. However, the IMT and Expanded Dispatch will still be required to coordinate the assignment of the “S”#.

Add an extra **0** to the front of the NFES# to query an item when ordering supplies in ROSS. To query an item use * before and * after the name, i.e. *food*. This will access all resources with the word **food** in it.

For kits (chainsaw, etc) order 1 each and put actual quantity in special needs, enter all the required data, then select the + radio button. Edit request and enter the amount you are actually ordering. One S# for the kits and Service requests would then be generated; e.g., 100 gallons of gasoline ordered; the request is for 1 delivery. Add the 100 gallons in special needs, otherwise 100 S# would be generated.

To fill a **New Request** and the item is not in the catalog, select **Service Supply – Not in Catalog**. Document the piece of equipment being requested, the Agency Identifier, ID #, a property # or serial #, as well as a home unit telephone #. This also helps to facilitate the correct demob point and the payment process.

Local Fire Caches The Central Idaho Fire Cache (CIK) is located in Salmon and primarily supports the Salmon Field Office, North Fork, Leadore and Salmon-Cobalt Ranger Districts. The Challis Fire Cache (CHK), located in Challis, supports the Challis/Yankee Fork, Middle Fork and Lost River Ranger Districts and the Challis BLM Field Office.

Great Basin Cache (GBK) Prior to ordering, alert GBK of a pending order at the 24-hour phone number. Resource orders can be processed using either ROSS or by faxing the request completed on paper stock.

Resource orders faxed to GBK with multiple request numbers (on the same page) requiring different shipping methods or destinations must be faxed on separate pages. Each resource order page faxed to GBK should only show the request numbers to be shipped together to one destination. Line through (black out) request numbers not being shipped in the same manner or to the same destination.

The Center Manager will make the determination whether Expanded Dispatch will process requests for Type 3 and 4 incidents.

Equipment

NFES Equipment Orders Requests unable to fill locally or thru the neighborhood policy will be submitted to EBC.

National Incident Radio Support Cache (NIRSC) radio systems and kits will be requested on a ROSS Equipment Order through established ordering channels to EBC. To insure proper frequency coordination, the latitude and longitude of the incident are entered in ROSS. To maintain quality and quantity for the field, each Starter System or kit will be returned to NIRSC for rehabilitation immediately after each an assignment.

Equipment Fill To fill a rental vehicle in ROSS use the **Fill with Agreement** option. Provide sufficient information that the incident can identify the vehicle by the “E” number.

The standard fill information will be:

Type – Make/ Model – Vendor – License #

Example: SUV – Ford Explorer – Quality Motors - ID 2L XX

Provider (Who issued the contract): e.g., ID-SCF

Vendor: e.g., Quality Motors

Return: e.g., Salmon, Idaho

Release: Select Incident Resources Screen, release the vehicle according to the information provided.

In the ROSS fill block do not fill with requested item.

Although the option generates a vendor block to type in name of vendor, this will document the resource requested not assigned. The vendor will not show as the resource assigned.

Steps to fill the **Fill with Agreement:**

- Select **Local Purchase** radio button
- Highlight the **Top Line**, cut and copy to the **Description** box
- In the top and bottom lines enter the Vendor or Cache identifier
- The Resource assigned will identify the Vendor and show as **filled/closed**.

I-BPA Competitive preseason contracts are awarded using a best value award process to determine the dispatch priority. Award is based on reasonable price, acceptable past performance, qualified personnel and minimum equipment standards. The Dispatch Priority List (DPL) is based on price and various equipment and/or personnel attributes.

Dispatch Priority (DPL) Priority will be given to contracted resources under a competitive agreement for all extended attack incidents. Dispatch priority for contracted resources does not preclude the Government from using any agency owned or agency cooperator resources for initial attack or extended attack/large fire support before ordering/mobilizing contracted resources under agreement. Agency owned and/or agency cooperator resources may be requested at any time.

The DPL for CIC will be posted to the EBC Web site under Equipment/Supplies, providing a link to the FS DPLs at: <http://www.fs.fed.us/business/incident/dispatch.php>. CIC will ensure the most recent version of the DPL is utilized.

Available Contractors on the DPL must be contacted in the order of the DPL ranking. If the Contractor cannot be reached, is not able to meet the date and time needed, or provide the requested resource(s), the dispatcher may proceed with contacting the next available contractor identified on the DPL.

Incident Only EERA Non-competitive agreements shall be awarded both preseason and incident only, but do not follow a best value dispatch order. Incident only resources may be hired through the established dispatch ordering once the I-BPA resources have been exhausted due to availability. Incident only EERAs are valid only for the duration of the incident they were signed up on. Once the incident releases the contracted resources, the agreement is no longer valid.

CIC maintains a Resource List with Incident Only EERAs listed in ranking for dispatch in support of IA and once the DPL is exhausted. CIC has a rotation process in place and will provide the Expanded Dispatch organization with this once Expanded is activated. Dispatchers will document all actions and contacts in the appropriate system of record (ROSS).

Potable Water Sources

APPENDIX I

Demobilization Expanded Dispatch shall work closely with CIC, their neighbors and EBC to plan for a safe, orderly and cost-effective demobilization and the reassignment of incident resources. Great Basin Mobilization Guide guidelines shall be followed.

The orderly flow of personnel and resources from an incident to the place of origin must follow the reverse order of mobilization and remain within established communication channels. Emphasis will be placed on having personnel home no later than 2200 local time. It must be recognized that occasionally the availability of large transport aircraft will dictate time frames.

A Demobilization Plan will be prepared by the IMT with the Agency and Supervisory Dispatcher concurrence. Expanded Dispatch will be responsible for travel arrangements and release notifications in ROSS. Release information for all functional areas must be promptly relayed using an itinerary.

Demobilization Procedures The IMT will forward to Expanded Dispatch tentative releases of resources and will include the following:

1. Request Number

Expanded Dispatch Plan

2. Name of Resource
3. Release Date/Time
4. Travel Method
5. Travel Destination

When a release order has been authorized, the mode of transportation, including vehicle identification number, home unit, and estimated time of departure from the Incident Command Post (ICP) will be given. Personnel will be grouped to make efficient use of travel arrangements. Adequate rest will be provided prior to demob for all resources.

Crews will have the crew name, home unit, resource order number, request number, total crew weight (if traveling by air), the Crew Boss and Agency Liaison identified on the demob form. Crews are released with a current transportation manifest forwarded to Expanded Dispatch.

Information will specify the last days off, how many days left before end of commitment and demob, and if available for reassignment. Although resources may be reassigned within geographical areas and zones, they will be released on the original order and request number.

Coordinate with CIC and EBC for reassignments. Expanded Dispatch will notify the incident that the resource has been reassigned and the travel arrangements.

The incident shall give Expanded Dispatch a 24-hour notice of surplus resources and National Resources with tentative release. There will be a 48-hour notice for NICC jet transportation. Five or more crews are needed to fill the NICC jet. Coordination with adjacent centers should be attempted to get a full jet load. The Crews desk shall coordinate the jet request through CIC.

Coordinate travel from the incident to the nearest jetport with the IMT and the local transportation unit. The primary and secondary jetports are identified on the request. Idaho Falls (IDA) and Missoula (MSO) are the nearest jetports.

Charter aircraft travel will be coordinated with EBC and/or adjacent dispatch centers to ensure cost-effective transportation. The Aircraft Dispatcher schedules charter flights and has Flight Following responsibilities. Expanded Dispatch will request a charter aircraft by completing the Aircraft Flight Request / Flight Schedule.

Rental vehicles will have a post-use inspection completed and released in ROSS. Coordination with the Buying Team is necessary to close-out equipment releases.

Release National Fire Cache Radio Command and Logistics systems as soon as possible. Do not hold radio kits on local unit; return to GBK for refurbishing.

Travel The Salmon-Challis National Forest has a Centrally Billed Account (CBA) with Manassas Travel. Upon activation of Expanded Dispatch the travel procedures will be implemented for resources traveling by commercial air once released from the incident. The Travel Binder is located in Initial Attack (Refer Travel Procedures located in the binder).

Travel The USDA Forest Service Emergency Travel form was developed to encompass information needed to ensure security when making reservations and to provide information for the CBA.

During business hours call Manassas Travel with appropriate information. After business hours fax the completed Forest Service Incident Fax Form to the After Hours fax, then call and leave a message.

Provide the following information:

1. Incident/Resource Number
2. Accounting Codes
3. "Zone Code"
4. First and Last Name of Traveler(s) & Date of Birth
5. Departing Airport
6. Departure Date & Time
7. Destination Airport
8. Arrival Date & Time

Manassas will fax the itinerary. Request that the faxed itinerary have the price of the ticket included. Fax a copy of the itinerary to the travelling party or ICP and then file the itinerary for fire documentation.

Complete the Emergency Fire Travel Log. Data in the Log Book should be entered by the date of the travel. This will help facilitate reconciliation for CBA payments. After Travel Arrangements have been completed:

1. Make a copy each of the Resource Order and the Flight Itinerary/eTicket. Attach a Resource Order to the eTicket.
2. The copies go with the final fire packet. These forms can be accumulated and forwarded weekly to Dispatch.

Airline Codes

APPENDIX J

Close Out Prior to close-out, all supplies for refurbishing the Expanded Kits will be ordered and the final packet prepared for CIC. The Center Manager determines when additional dispatcher support is no longer needed and facilitates the transition back to CIC. The Center Manager will be briefed on the status of resources and unresolved issues.

Final Fire Packet The Expanded Dispatch final packet contains:

1. Generate PDF file(s) of all ROSS incident(s) resource orders
2. Copy of Demobilization Plan
3. Inventory of all resources remaining on the incident(s)
4. Logs, shift logs and other related documentation
5. Incident narrative by section including claims against the incident, Tort Claims, CA-1s, Property Loss/Damage Reports, Witness Statements, etc.
6. IMT Demob Schedules

APPENDIX D

<u>FIRE OVERHEAD PERFORMANCE RATING</u> This rating is to be used only for determining an individual's dispatch qualifications.					INSTRUCTIONS: The immediate job supervisor will prepare this form for each subordinate overhead. It will be delivered to the Coordinator before the rater leaves the assignment. Rating will be reviewed with employee who will sign at the bottom.									
1. Name					2. Fire Name and Number									
3. Home Unit (Address)					4. Location of Fire (Address)									
5. Dispatch					6. Date of Assignment									
7. Complexity					8. Level of Activity									
SINGLE		MULTIPLE			LIGHT		MODERATE			HEAVY				
9. EVALUATION														
Enter X under appropriate rating number and under proper heading for each category listed. Definition for each rating number follows: 0 – Deficient. Does not meet minimum requirements of the individual element. DEFICIENCIES MUST BE IDENTIFIED IN REMARKS. 1 – Needs to Improve. Meets some or most of the requirements of the individual element. IDENTIFY IMPROVEMENT NEEDED IN REMARKS 2 – Fully Satisfactory. Employee meets all requirements of the individual element. 3 – Outstanding. Employee consistently excels the performance requirements.														
	Dispatch Recorder				Support Dispatcher				Supervisory Dispatcher					
RATING FACTORS	0	1	2	3	0	1	2	3	0	1	2	3		
Knowledge of the Job														
Following Procedures														
Completes Work in Timely Manner														
Work Done Properly														
Attitude														
Initiative														
Communications														
Getting Along With Others														
Other (Specify)														
10 - REMARKS														
11 - DISPATCHER (signature) This rating has been discussed with me.										12 - DATE				
13 – RATED BY (signature)				14 – HOME UNIT			15 - POSITION			16 - DATE
